

REMARKS

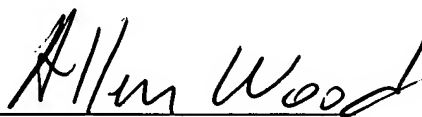

The present U.S. application was apparently filed without Figures 20 and 21. However, these figures appear in one of the two Japanese priority applications for the present U.S. application (specifically, Japanese application 2003-055264, although the same drawings appear as Figures 11 and 12 in the other Japanese priority application). The present U.S. application incorporates both Japanese priority applications by reference (see page 62 of the present application, lines 3-6).

The purpose of the present Preliminary Amendment is to correct the U.S. application by adding Figures 20 and 21, which (as was noted above) are incorporated by reference. Although certified copies of both priority applications have already been filed, a copy of the relevant drawing sheet from Japanese application 2003-055264 is attached. Since revisions have been added in red ink to show how these figures should be modified for use in the present U.S. application, this attachment is labeled "Proposed Drawing Changes."

A sheet of formal drawings that adds Figures 20 and 21 and incorporates the proposed drawing changes is also attached. It is stamped "Replacement Sheet," although it would probably be more accurate to say that it is newly added.

Examination of this application on its merits is respectfully requested.

Respectfully submitted,

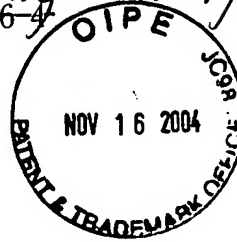

Allen Wood
